Mid-Term Project

Restaurant Picker App:
- Users can add restaurants they wouldn't mind eating at to a list.
- Users can delete items from their list
- Users can then have the app randomly pick a restaurant they entered from the list for them to go eat at.

Steps
A user enters an item on the form on the site.
They can then review what they have and delete and add as they wish
User clicks Randomize button to have algorithm choose a place!
